CAREER OBJECTIVE

BSc Computing student at Itahari International College with Python, Pandas, and Scikit-learn experience, including a COVID-19 data analysis and a Titanic survival prediction model. Passionate about applying machine learning to real problems. Seeking a data science or AI/ML internship to contribute meaningfully and grow under experienced mentorship.

EDUCATION

BSc (Hons) Computing

2024 — Present

Itahari International College (London Metropolitan University) | Itahari, Nepal

Higher Secondary Education (Science)

2024

Vishwa Adarsha Secondary School, Itahari, Sunsari

PROJECTS

COVID-19 Global Data Analysis

Python • Pandas • Matplotlib

- Analyzed global COVID-19 trends, death rates, and vaccination progress across 150+ countries using real-world datasets sourced from Our World in Data.
- Produced time-series visualizations and comparative charts identifying vaccination coverage gaps and peak mortality periods by region.

Titanic Survival Prediction

Python • Scikit-learn • Pandas

- Built a binary classification model to predict passenger survival on the Titanic dataset, achieving over 80% accuracy using Logistic Regression and Random Forest.
- Compared model performance using cross-validation and confusion matrix analysis; Random Forest outperformed Logistic Regression by approximately 4% in accuracy.

SKILLS

Technical

- Languages:** Python, SQL
- Libraries:** NumPy, Pandas, Matplotlib, Scikit-learn
- ML Models:** Regression, Decision Trees, Random Forest
- Tools:** Git, GitHub, Jupyter Notebook

Soft Skills

- Problem-Solving:** Applying logic to data challenges
- Analytical Thinking:** Extracting insights from datasets
- Self-Directed Learning:** Active study via Kaggle and research
